

Day-06 python interview questions

1. Write a Python program that prints using while loop:

- a) The first 10 even numbers**
- b) The first 10 odd numbers**
- c) The first 10 natural numbers**
- d) The first 10 whole numbers**

2. Write a Python program that prints the first 10 integers and their squares using a while loop

3. Write for loop statement to print the following series:

10,29,30 30

4. Write for loop statement to print the following series:

105,98,91 7

5. Write a Python program that print first 10 natural numbers using while loop in reverse order using while loop

6. write a program to print table of a number entered from the user.

7. prime or not using while

For loop

1: Python program to print a multiplication table of a given number

2: Python program to count the total number of digits in a number.

3: Python program to find the factorial of a given number.

4: Python program to convert the month name to a number of days.

5. Print numbers in reverse from 10 to 1 using a for loop:

6. Print numbers from 1 to 10 using a for loop:

7. Calculate the sum of numbers from 1 to 10 using a for loop:

- 8. Print the elements of a list using a for loop:**
- 9. Calculate the product of elements in a list using a for loop:**
- 10. Print numbers in reverse from 10 to 1 using a for loop:**
- 11. Print characters of a string using a for loop:**
- 12. Find the largest number in a list using a for loop:**
- 13. Count the number of vowels in a string using a for loop:**
- 14. Print a pattern of stars using nested for loops:**
- 15. Calculate the factorial of a number using a while loop:**
- 16. Find all prime numbers between 1 and 50 using nested for and if:**
- 17. Print numbers divisible by 3 or 5 from 1 to 20 using a for loop:**
- 18. Print the Fibonacci sequence up to the 10th term using a loop:**
- 19. Difference between while and for**
- 20. for loop syntax**
