

PYTHON-TEST-05-Apr-B

Section A: Multiple Choice Questions

10 × 1 = 10 Marks

Q1. Which data structure is ordered and changeable?

- a) tuple b) list c) set d) dictionary

Q2. How do you create a tuple?

- a) [1, 2, 3] b) (1, 2, 3) c) {1, 2, 3} d) tuple[1, 2, 3]

Q3. What is the output of len([10, 20, 30])?

- a) 2 b) 3 c) 4 d) Error

Q4. Sets do not allow:

- a) numbers b) text c) duplicates d) symbols

Q5. Which keyword is used to define a function?

- a) def b) func c) function d) lambda

Q6. What is the correct way to access the value of 'name' in a dictionary student = {"name": "John"}?

- a) student('name') b) student.name c) student['name'] d) student->name

Q7. Which of these is immutable?

- a) list b) dict c) tuple d) set

Q8. What does my_list.append(4) do?

- a) Replaces value b) Removes value c) Adds value d) Sorts the list

Q9. Which is used to remove an item from a set?

- a) delete() b) remove() c) discard() d) Both b and c

Q10. Which structure uses key-value pairs?

a) list b) tuple c) set d) dictionary

Section B: 2-Mark Question

10 × 2 = 20Marks

Q1. Define a list and write any 2 list methods.

Q2. What is the difference between a tuple and a list?

Q3. Write the syntax to create a set and add an item to it.

Q4. What will be the output of:

```
my_tuple = (10, 20, 30)
```

```
print(my_tuple[1])
```

Q5. Write a small function that prints "Welcome to Python!"

Q6. What is the output of this code:

```
s = {1, 2, 3, 2}
```

```
print(s)
```

Q7. What will be the output of:

```
student = {"name": "Anu", "age": 12}
```

```
print(student["age"])
```

Q8. How is update() used in dictionaries? Give an example.

Q9. Write one use of the return statement in functions.

Q10. What does list(range(1, 5)) return?

Section C: Coding Questions

4 × 5 = 20 Marks

Q1. Write a function that takes a list of numbers and returns the sum of all elements.

Q2. Write a program to:

Create a dictionary with keys: name, age, grade

Print each key and its value

Q3. Write a function that accepts a tuple of numbers and prints only the even numbers.

Q4. Write a program to:

Create a set with 5 values

Remove one value using discard()

Print the final set
